DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species 1 in the reply filed on 06 October 2005, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 29-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species.
2. Upon further consideration, the examiner has determined that there are additional species in the claims, and they are set forth as follows.
3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1a: figures 1-7;

Species 1b: figures 8-15;

Species 1c: figures 16-17;

Species 1d: figure 24;

Species 1e: figure 25;

Species 1f: figure 26;

Species 1g: figures 27-28;

Species 1h: figure 29.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Species 1a: claims 1, 2, 8, 9;

Species 1b: claims 1-5, 8, 10;

Species 1c: claims 1, 2, 8;

Species 1d: claims 1, 2, 6-8;

Species 1e: claims 1, 2, 8, 11-13;

Species 1f: claims 1, 2, 8, 14-18;

Species 1g: claims 1, 2, 8, 19-25;

Species 1h: claims 1, 2, 8, 26-28.

The following claim(s) appear to be generic: 1, 2, and 8.

Art Unit: 3616

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Species 1a: special technical feature is electronically controlled geared electric motor;

Species 1b: special technical feature is pneumatically driven landing gear, driven by air braking system;

Species 1c: special technical feature is manually effected speed change of landing gear and 2-speed electric motor;

Species 1d: special technical feature is direct drive socket manual override of landing gear drive mechanism;

Species 1e: special technical feature is wireless remote control switching;

Species 1f: special technical feature is master control unit with field switches;

Species 1g: special technical feature is brush wear detector;

Species 1h: special technical feature is motor current detector.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
